

NORLER 

www.norlertools.com

About Us

NORLER is a Chinese diamond tools company committed to offering the wide range of quality diamond tools for cutting, coring, grinding and polishing, all types of construction and stone products, Our wide range includes Diamond Saw Blades, Diamond Core Drill Bits, Diamond Grinding Cup Wheels, Diamond Polishing Pads and Diamond Tools for Surface Preparation.

As an experienced supplier with over the years in professional field, we are very proud to recommend our premium diamond tools to the market. Our sinter diamond blade which is best all round blade for DIY market provide fast, free and smooth cutting. Our laser welded diamond saw blade which is the greatest quality, it designed with the high diamond concentration, provides more faster and longer life time, also with features of safety and reliable cuttings to the users. To use with our metal bond diamond grinding tools will give you fast cutting and more aggressive on heavy duty floors, let you spend less time on site and save budget;

Our products are exported to Europe, USA, Australia, Middle East and Asia, etc; We offer a powerful technology team, advanced production line and inspection equipment; ISO9001-2000 quality control system and ISO14001-2004 environment system is we strictly conform to; EN standard is which we follows in inspection between processes.

Today, we continue to design, develop and manufacture, offering the widest diamond tools in the international market. Our dedication to a firm policy of customer care and customer satisfaction has achieved progressive and constant growth with good reputation for reliability and excellence.

We welcome any questions and inquiries you have, if you do not see what you need in our catalogue or website, please contact us at info@norlertools.com we can help you.

Customer Reading

So far, NORLER main offering Diamond Saw Blades, Diamond Core Drill Bits, Diamond Grinding Cup Wheels, Diamond Polishing Pads and Diamond Tools for Surface Preparation.

Diamond Saw Blades

NORLER provides types of sintered diamond blade, laser welded diamond saw blade and stone saw blade.

Sintered diamond blade which is an economical blade for small amount of cutting works, this kind saw blade is by cold press or hot press sintered, size main below 400mm diameter, it is basic line general purpose blade for fast cutting concrete, tile, brick, granite, marble, etc. materials, to fit the equipment like angle grinders, circular saws and table saws etc, the type includes segmented rim blade, continuous rim blade and turbo rim blade.

Laser welded diamond saw blade, as the name implies which it is by laser welding technology, the benefits of laser welded diamond saw blade which as following:

- Stronger adhesion of the diamond segments to the steel core
- Longer life and cut faster than sintered diamond blades
- Instead of traditional brazed diamond saw blades, as the diamond segment tend not be broken or fall off from the steel core
- Dry cutting work under the harsh condition
- Safety and reliability to the users

Besides above, the size can be made up to diameter 900mm and even more larger, that which sintered diamond blades can not to be achieved now, the blades fit to most handed saws and walk behind floor saws. And the types included general purpose saw blade, cured concrete saw blade, reinforced concrete saw blade, asphalt and green concrete saw blade, wall saw blade, etc. main in construction cutting products.

Our laser welded diamond saw blades are manufactured by using the best machine Dr. Fritsch which Germany brand, this good brand machine enable to turn out constant higher quality and safety products.

Stone Saw Blade, NORLER main focus on granite saw blade, marble saw blade and ceramic saw blade, those best blades provide high efficiency, precision and chip-free performance

Diamond Tools for Surface Preparation

It is a fast growing industrial diamond tools for surface preparation, NORLER realized it is urgent needed in servicing Surface Preparation sector, with many years effort we done very successfully.

We now bring out the products range covers:

Bolt on type trapezoid grinding plates, quick change type metal bond grinding tools, 10" floor grinding heads, PCD grinding plates, grinding pucks, grinding plugs, diamond grinding cup wheels, diamond polishing pads and other tools etc.

They are used for grinding and polishing concrete, stones or removal of paint, glue, epoxy and other floor coating, etc materials; To use on handed grinders and floor grinders.

According to the different floors, we define our metal bond grinding tools have soft bond, medium bond and hard bond; Soft bond which for using on grinding hard floors, medium bond for general purpose and hard bond for using on grinding soft floors. The grit size we offering by #16/20, #30/40, #60/80, #120/150. Then the coarse size such as grit #16/20 for material removal in the initial starting, the grit #30/40 for rough grinding, grit #60/80 for medium grinding, grit #120/150 for fine grinding.

Whilst, our diamond floor polishing pads provided remove scratch quickly, high-gloss finish and never stain the floor after polishing.

CONSTRUCTION

1. SINTERED DIAMOND BLADES

Sintered Diamond Blades which is an economical blade for small amount of cutting works, this kind saw blade is by cold press or hot press sintered, size main below 400mm diameter, it is basic line general purpose blade for fast cutting concrete, tile, brick, granite, marble, etc. materials, to fit the equipment like angle grinders, circular saws and table saws etc, the type includes segmented rim blade, continuous rim blade and turbo rim blade.

1.1 Segmented Rim Diamond Blade

A general purpose blade for a wide range of materials, such as masonry, bricks, blocks, slate, stone and concrete, etc.

Diameter	Thickness(mm)	Height(mm)	Code
4"(105mm)	1.8	7/10	SIN 0105 SEG
4.5"(115mm)	1.9	7/10	SIN 0115 SEG
5"(125mm)	1.9	7/10	SIN 0125 SEG
6"(150mm)	2.0	7/10	SIN 0150 SEG
7"(180mm)	2.2	7/10	SIN 0180 SEG
8"(200mm)	2.4	7/10	SIN 0200 SEG
9"(230mm)	2.6	7/10	SIN 0230 SEG
10"(250mm)	2.6	7/10	SIN 0250 SEG
12"(300mm)	3.2	7/10	SIN 0300 SEG
14"(350mm)	3.2	7/10	SIN 0350 SEG
16"(400mm)	3.6	7/10	SIN 0400 SEG

1.2 Continuous Rim Diamond Blade

Fast cutting for tile, ceramic, granite, marble and other stone materials, it always perform clean, chip-free cutting.

Diameter	Thickness(mm)	Height(mm)	Code
4"(105mm)	1.8	5/7/10	SIN 0105 CON
4.5"(115mm)	1.9	5/7/10	SIN 0115 CON
5"(125mm)	1.9	5/7/10	SIN 0125 CON
6"(150mm)	2.0	5/7/10	SIN 0150 CON
7"(180mm)	2.2	5/7/10	SIN 0180 CON
8"(200mm)	2.4	5/7/10	SIN 0200 CON
9"(230mm)	2.6	5/7/10	SIN 0230 CON
10"(250mm)	2.6	5/7/10	SIN 0250 CON

14"(350mm)	3.2	5/7/10	SIN 0350 CON
16"(400mm)	3.6	5/7/10	SIN 0400 CON

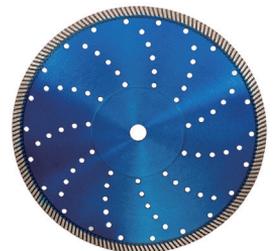

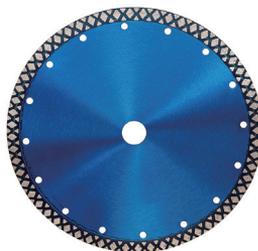

1.3 Turbo Rim Diamond Blade

The turbo rim type diamond blade gives an air cooling effect during cutting and also it helps speed up the process without chipping. Continuous turbo rim provide safe and fast smooth cutting works. It offers fast cutting various construction materials, such as concrete products, brick, block, hard granite, clay, cement roof tile, limestone, sandstone, etc materials at competitive cost.

Diameter	Thickness(mm)	Height(mm)	Code

1.4 Segmented Turbo Diamond Blade

Segmented Turbo rim diamond blade is designed for better cooling and better dust removal, ensure a fast cutting speed. It offers general purpose cut, and medium hard concrete, reinforced concrete, universal masonry, medium hard granite, most civil engineering materials.

Diameter	Thickness(mm)	Height(mm)
4"(105mm)	2.0	10

2.LASER WELDED DIAMOND SAW BLADES

Laser welded diamond saw blades have a longer life and cut faster than sintered diamond blades, it provides safety and reliable cuttings to the users.

The size can be made up to diameter 900mm and even more larger, that which sintered diamond blades can not to be achieved now, the blades fit to most handed saws and walk behind floor saws. And the types included general purpose saw blade, cured concrete saw blade, reinforced concrete saw blade, asphalt and green concrete saw blade, wall saw blade, etc.

2.1 Diamond Saw Blade for General Purpose

It is best general purpose saw blade on the market designed to cut most materials, like general concrete materials, bricks, block, slate, sandstone, granite, tile and refractory materials, etc. It provides long life free cutting.

2.3 Diamond Saw Blade for Asphalt/Green Concrete

It is designed for cutting abrasive materials, like asphalt, green concrete, asphalt over concrete, tarmac. And it is provided with undercut protection design of like wedge segment, slant segment, drop- segment, diamond insert, etc.

Diameter	Length(mm)	Thickness(mm)	Height(mm)	Code
12"(300mm)	40	3.2	10/12	LAS 0300 ASP-W

4. DIAMOND GRINDING CUP WHEELS

Diamond grinding cup wheels are designed for efficient grinding concrete, stones, and removal of paint, glue and other floor coatings, etc materials, fit to angle grinders and floor grinders.

4.1 Single Row Grinding Cup Wheel

Row type grinding cup wheels are an excellent and economical way to grind a variety of hard materials such as concrete, stone and masonry; Use Single Row Grinding Cup Wheels for rough work and rapid stock removal.

Diameter	Segments	Code
4"(105mm)	8	DGW 105 SR
5"(125mm)	10	DGW 125 SR
7"(180mm)	12	DGW 180 SR

Segment Height:5mm

4.2 Double Row Grinding Cup Wheel

Use double row grinding cup wheels for finer finishing.

Diameter	Segments	Code
4"(105mm)	12	DGW 105 DR
5"(125mm)	20	DGW 125 DR
7"(180mm)	24	DGW 180 DR

Segment Height:5mm

4.3 Turbo Row Grinding Cup Wheel

Turbo row grinding cup wheels give fast, aggressive removal of concrete etc materials, with multi-hole metal body, gives cooling and reduce heat while grinding, reach at optimum performance.

Diameter	Segments	Code
5"(125mm)	18	DGW 125 TR
7"(180mm)	12	DGW 180 TR
7"(180mm)	24	DGW 180 TR

Segment Height:5/10mm

4.4 Arrow Segment Grinding Cup Wheel

Arrow segment grinding cup wheels are designed to provide the operator with fast production rates and long life, the segment is slanted at an angle away from the core of the cup wheel, this allows the segment to scrape and grind at the same time.

Diameter	Segments	Code
4"(105mm)	5	DGW 105 AR
5"(125mm)	6	DGW 125 AR
7"(180mm)	10	DGW 180 AR

Segment Height:8mm

4.5 R3 Grinding Cup Wheel

R3 grinding cup wheels give excellent grinding, high cutting efficiency for aggressive surface preparation, with the large air hole design improves cooling and dust evacuation.

Diameter	Segments	Code
7"(180mm)	3	DGW 105 R3
7"(180mm)	9	DGW 125 R3
7"(180mm)	18	DGW 180 R3

Segment Height:5/10mm

4.6 T-Segment Grinding Cup Wheel

T-Segment grinding cup wheels are used for cleaning, thin coating removal, edging and concrete leveling.

Diameter	Segments	Code
5"(125mm)	10	DGW 125 TS
7"(180mm)	14	DGW 180 TS

Segment Height:5mm

4.7 PCD Grinding Cup Wheel

PCD grinding cup wheels are designed for the quick removal of the thick coating of epoxy, glue, paint and resin on concrete floors, these tools provide a smooth finish to any concrete surface and works much faster than general metal bond diamond grinding tools.

Diameter	Segments	Code
5"(125mm)	9	PCW 125 TC
7"(180mm)	12	PCW 180 TC

Diameter	Segments	Code
4"(105mm)	5	PCW 105 HC
5"(125mm)	6	PCW 125 HC
7"(180mm)	6	PCW 180 HC

4.8 Floor Grinding Head

10" floor grinding heads are designed for smoothing rough areas in quickest time, and giving optimum performance in concrete preparation, leveling concrete surface and removal of various thin coatings

Diameter	Segments	Code
10"(250mm)	20	FGH 250 BAR

Segment Height:10mm

Diameter	Segments	Code
10"(250mm)	20	FGH 250 ARR

Segment Height:8mm

Diameter	Segments	Code
10"(250mm)	16	FGH 250 PCD

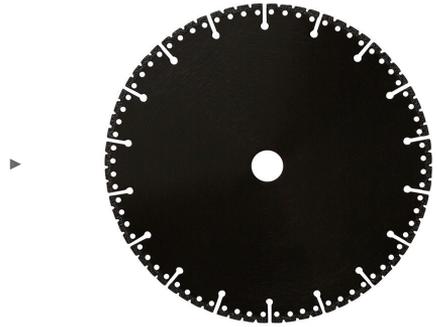

5. RESCUE BLADES

Rescue blades or called multi-purpose blades, which is by vacuum brazed technology, the diamond particles are fused directly to the steel core creating the strongest heat resistant bond available when cutting without water cooling;

One blade for all cut, superior cutting efficiency in all types of materials such as steel, concrete, rebar, masonry, plastics, stone, wood, ductile iron, PVC, stainless steel, roof decking, etc.

Diameter	Thickness(mm)	Height(mm)	Code
4"(105mm)	2.0	5	RB 0105 ACG
4.5"(115mm)	2.0	5	RB 0115 ACG
5"(125mm)	2.2	5	RB 0125 ACG

14"(350mm)	43	2.4	10	CER 0350

2. DIAMOND RESIN POLISHING PADS

2.1 Wet Polishing Pad

Main use for granite, marble, engineered stone surfaces, high gloss finish in short time and long life.

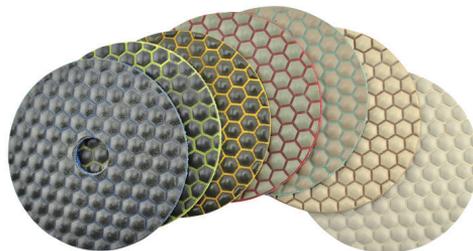

▲

Diameter	Grit	Code
3"(80mm)	50/100/200/400/800/1500/3000	RES 080 WP
4"(100mm)	50/100/200/400/800/1500/3000	RES 0100 WP
5"(125mm)	50/100/200/400/800/1500/3000	RES 0125 WP

2.2 Dry Polishing Pad

Use for stone material polish, more faster polish than most of the dry pads

▲

Diameter	Grit	Code
4"(100mm)	50/100/200/400/800/1500/3000	RES 0100 DP

3. CORE DRILL BITS

Vacuum Brazed Core Drill Bits

Vacuum Brazed Core Drill Bits are mainly used to drill granite, marble, hard porcelain and tiles, with years of research and application of drilling bit and the word advanced technology of diamond brazing. This bit is characterized in very free cutting, high efficiency, excellent performance and long working life.

4. PROFILE WHEEL

Vacuum Brazed Profile Wheel

These vacuum brazed diamond profile wheels are designed for fast removal of materials, such as profiling granite, marble and limestone, each wheel has a rubber guide to protect the wheel from marring the material.

AVAILABLE PROFILES

Surface Preparation

1. DIAMOND GRINDING PLATES

1.1 Trapezoid Grinding Plate

The most suitable metal bond diamond grinding plates specifically for floor surface preparation, quick removal of materials with quality consistency.

16/20# for material removal, 30/40# for rough grinding, 60/80# for medium grinding, 120/150# for fine grinding.

■ = Soft Bond for Hard Concrete ■ = Medium Bond for General Purpose ■ = Hard Bond for Soft Concrete

1.2 Quick Change Grinding Plate

We manufacture premium quality diamond grinding plates which suitable for Husqvarna, Lavina, HTC etc floor grinders.

With improved diamonds, gives operators spending less time on site, cutting fast, more aggressive and save your budget.

1.4 PCD Grinding Plate

PCD (Polycrystalline Diamond) is synthetic diamond that is used in non-ferrous application, has superior hardness, high fracture strength and uniformed properties, as well as excellent wear resistance and high thermal conductivity. The PCD grinding plates are designed for the quick removal of the thick coating of epoxy, glue, paint and resin on concrete floors, these tools provide a smooth finish to any concrete surface and works much faster than general metal bond diamond grinding tools.
